

***Saasler for Geckoboard* enables business users to visualize virtually any data set on a Geckoboard.**

Saasler Intelligent Connectors can be adapted to all sorts of data sets and sources, making it easy to collect data and send it to Geckoboard. Whether it's a REST or SOAP API, a file on an FTP server or even an email report, we can handle it.

Integration specialists will help define and set up the necessary integrations so that anyone with a Geckoboard account can easily create and edit any type of data visualization.

***Saasler for Geckoboard* plans are tiered based on the type integration:**

Tier One Integrations for REST API	Tier Two Integrations for SOAP or other API Standards	Tier Three Integrations via Database access(MySQL, Postgres,etc), FTP or Email
\$100 INTEGRATION / MONTH	\$300 INTEGRATION / MONTH	\$600 INTEGRATION / MONTH

Designed for Business Users

You don't need to be a developer to be able to use Saasler for Geckoboard. Integration specialists will gather the requirements and will help get everything set up every step of the way.

Keep Information Fresh

Dataset updates can be updated as often as every five minutes, depending on the the data set or sources.

Fast Setup Times

Typical times to completion after requirements are defined and approved are 1-2 weeks for Tier One, 2-4 weeks for Tier Two and up to 4 weeks for Tier Three Integrations.

All you need is an API

An API (application programming interface), basically a set of instructions apps can use to communicate with each other, is all you need to get started.

All the integrations you need

There's no limit to the number of integrations we can set up.

Simple Billing

Get 12 months for the price of 11. We will charge you the annual cost upon delivery and you will have Saasler for Geckoboard access for the next 12 months.
